## User's guide for the online shop

The law states that an online shop must follow certain steps of providing information. This can make the process of purchasing a little difficult and tedious. However here at Sodemann we naturally follow the rules stated by law.

## Welcome to our Online shop

This is our selection of spring types. Each section contains sub-sections with even more choice. On the bottom of this page is an instruction on the use of our web shop. As an illustration we have chosen Die Springs.

Search for stock number here.

## Choice of a product line

On this page it is possible to choose between the different product lines. In the example a die spring of the best quality is desired - therefore we choose the Raymond quality.

## Choose the spring which suits your needs

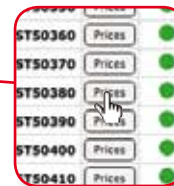

Find the spring in the list, or choose the desired values in the drop down menu at the top.

Our search engine will automatically find all springs within the stated tolerances.

Place your mouse pointer over our stock number and the actual spring will be displayed.

Click on the shown price beside the chosen stock number. As an illustration we have chosen ST50380. The green symbol indicates that the spring is in stock.

## Download 3D CAD-files

Before you choose your amount you might like to avail of our 3D CAD service. The link on the right will guide you to our CAD pages. For more information on CAD please refer to page 22 - 23.

## Choose quantity

On this page prices, quantity discount and stock status are shown. As an illustration, we choose 50 pcs thus amount and price are defined.
